

# PATCHETT HEN FOLD

**Fully furnished Hen Fold System.**

**A house for up to 6 laying hens supplied with feed hopper, drinker, perch and nest, providing regular access to good pasture, natural light and fresh air.**

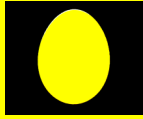

## **Worried about foxes, mink and other predators?**

**With this house your hens can be kept safe.**

- \* **Supplied in flat pack with assembly instructions, requiring only a screwdriver to put together.**
- \* **The house weighs about 50 Kg, is very rigid, so each end can be lifted easily, enabling one person to move the house sideways about 1 m. every day, or as often as required, to give the hens fresh grass in the run area.**
- \* **Easy access through the 2 doors, especially for egg collection.**
- \* **The wire floor in the closed area is 5 cm. x 2.5 cm. x 2 mm. mesh size, designed for bird comfort and makes for a clean environment for the hens**
- \* **The vertical side boards give wind protection for the birds in the run.**
- \* **Removable perch.**
- \* **The cord operated pop hole door enables the birds to be shut in the covered area at night, if required, or to be shut in either end during maintenance.**
- \* **Unbreakable plastic wall drinker supplied. Easy to clean and fill and keeps much cleaner than a floor- level drinker.**
- \* **Optional wire base for run, part number: 13459-MIS (Price £16.50). This results in cleaner eggs and makes the unit more secure.**
- \* **Supplied untreated.**
- \* **Parts hand assembled at Ryefield Works where the Patchett family has carried out joinery work for over two centuries. The company has been making poultry housing since 1936.**
- \* **Adaptable for other types of poultry.**
